Carson Turner

Oxford, MS | (423) 987-0713 | carsonturnersf@gmail.com | carsonturner.me | LinkedIn | GitHub

Education

University of Mississippi Oxford, MS
Bachelor of Science in Computer Science, GPA: 3.56/4.0 *May 2026*
- **Honors:** Dean's Honor Roll, SEC Spring Academic Honor Roll, College Sports Communicators Academic All-District

Graduate Certificate in Intercollegiate Athletic Administration *Expected May 2027*

Experience

Software Engineer Jan. 2026 – Present
Krastor Inc. *Remote*
- Sole engineer designing and shipping AI-native software for small businesses in real estate, construction, and the building trades
- Architect and deploy autonomous LLM agents that handle lead follow-up, customer communication, and quoting with minimal human oversight
- Build end-to-end operations systems that pair AI agents with deterministic business logic, automating workflows from first contact through invoicing
- Deliver production web platforms and CI/CD pipelines, including AI-assisted development workflows that let non-technical clients ship their own updates

Software Engineer Apr. 2025 – Jan. 2026
McCarren Capital *Remote*
- Built backend systems, CRM integrations, and email automation workflows to scale investor outreach for specialty finance transactions

Founder Nov. 2022 – Apr. 2025
Swift Flight LLC *Remote*
- Scaled an Amazon FBA online arbitrage business to $1.1M+ in revenue, supported by Python software that monitored competitor storefronts and sent real-time alerts on new listings

Projects

Mosaic – AI Creative Strategist for Meta Ads | *React, FastAPI, Supabase, pgvector, Claude API, Gemini* In Progress
- Building an applied-AI SaaS that syncs Meta Marketing API data and runs a multimodal pipeline (scene detection, transcription, vision tagging) on every video and static ad
- Ranks hooks, angles and formats by KPI with statistical shrinkage, clusters near-duplicate creatives via embeddings, and generates citation-grounded reports with tool-using agents, backed by a CI eval suite and Langfuse tracing

Rapha – AI-Powered Devotional App | *SwiftUI, TypeScript, Supabase, PostgreSQL, Claude API* Sep. 2025
- Built a multi-stage Claude pipeline on Supabase Edge Functions (TypeScript) that turns onboarding signals into personalized multi-week devotional plans, generating each week's content in parallel with prior-week context to prevent repetition
- Orchestrated background generation inside Postgres: a trigger queues later-week jobs on plan creation, and pg_cron with pg_net drives a retrying job processor
- Shipped a SwiftUI app with Apple/Google sign-in, a Superwall paywall, streaks, and a feedback loop where end-of-cycle ratings shape the next generated plan

Technical Skills

Languages: TypeScript, JavaScript, Swift, Python, Java, SQL, HTML/CSS, C++, C, R
Frameworks: React, Vite, Next.js, Node.js, SwiftUI, FastAPI, PyTorch
Developer Tools: Git, Docker, Supabase, Firebase, Vercel, Modal, Claude Code
AI Systems: Agentic workflows, LLM tool use and function calling, multi-step agent orchestration, prompt engineering, Claude API

Athletics

Division I Student-Athlete Aug. 2022 – May 2027
University of Mississippi Track and Field *Oxford, MS*
- Set the Ole Miss school record in the 600m and placed SEC runner-up in the distance medley relay while training 20+ hours per week
